SUMMARY

Full Stack Engineer with **2.5+ years of software engineering experience** building web applications, backend services, microservices, and cloud-based systems. Experienced with **React.js, Next.js, Node.js, Express.js, NestJS, FastAPI, PostgreSQL, Redis, AWS, Docker, and Kubernetes**, with additional experience building AI-powered applications using RAG, semantic search, vector databases, and LLM APIs. Reduced median API latency by **60%** (800ms → 320ms) through Redis caching and query optimization and built backend automation systems supporting **1K+ workflows per day**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, Microservices, WebSockets, MQTT

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD

AI & GenAI: Retrieval-Augmented Generation (RAG), LangChain, OpenAI API, Google Gemini, Embeddings, Semantic Search, Vector Databases (Qdrant, pgvector)

EXPERIENCE

AI Developer – SahioNext Technology Pvt. Ltd.

Oct 2025 – Apr 2026

Remote

- Designed and deployed RAG and LLM-powered features using **FastAPI, LangChain, Gemini APIs, Redis, and Qdrant**, reducing LLM inference costs by **35%**.
- Built backend microservices for transcript processing, semantic search, and document retrieval using **FastAPI** and vector similarity search for production AI applications.
- Engineered real-time streaming workflows using **WebSockets** and **MQTT**, implementing retry and fallback mechanisms to improve reliability across production messaging systems.
- Developed analytics dashboards using **React.js** and **Redux**, improving visibility into AI workflows and supporting production monitoring and incident diagnosis.

Full-stack Developer – The DevOpsTeam

Oct 2023 – Aug 2025

Bangalore, India

- Optimized high-traffic **Node.js** and **Express.js** APIs, reducing median response time from **800ms to 320ms** through Redis caching and database query optimization.
- Implemented real-time notification systems using **WebSockets** and supported **Docker- and Kubernetes-based** production deployments in collaboration with DevOps teams.
- Developed recommendation workflows for a job platform by matching candidate skills, preferences, and job requirements to improve personalized role discovery.
- Built **React.js** and **Next.js** onboarding experiences with A/B testing to improve user activation and signup conversion.

PROJECTS

WorkBridge – Project Collaboration Platform — Personal Project

May 2026 – Present

React.js, Next.js, Node.js, Express.js, Python, PostgreSQL, Redis, OAuth | Live Project

- Designed and developed a full-stack collaboration platform connecting students with industry projects through authentication, project management, skill-based matching, and real-time collaboration workflows.
- Built REST APIs for authentication, project management, role-based access control, and collaboration using **Node.js, Express.js, PostgreSQL, and Redis**.
- Integrated AI recommendation services for project matching using **RAG, semantic search, and agentic workflows** to improve project-matching relevance.

CERTIFICATIONS

Oracle Agentic AI Certified Foundations Associate – Oracle

Aug 2026

Oracle AI Vector Search Certified Professional – Oracle

Sep 2025

Machine Learning I – Columbia University

Aug 2025

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional – Oracle

Aug 2024

EDUCATION

Adichunchanagiri Institute of Technology

Chikkamagaluru, KA

Bachelor of Engineering, Visvesvaraya Technological University (VTU)

Aug 2023
